## **DETAILED ACTION**

### ***Response to Amendment***

1. This Office action addresses claims 23-29, 74, and 75. Applicant's arguments regarding the Lin and Kelley references (specifically regarding the term "pump device") are persuasive and the rejections over those references are withdrawn. However, the claims are newly rejected under 35 USC §102, as well as 35 USC §112, second paragraph herein. This action is non-final.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 24-29 and 75 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 24, 25, and 26 depend from claims 21 or 22, which have been canceled. Correction is required.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 23-29, 74, and 75 are rejected under 35 U.S.C. 102(b) as being anticipated by Lessing et al (U.S. Patent 5,641,585). The reference teaches a miniature ceramic fuel cell that is supported on a consumer device such as a mobile telephone (see Fig. 1). As shown in Figures 1 and 2, both the fuel and ambient air are pumped to the fuel cell using pumps (22, 26). The fuel is contained in a tank (18) that is insertable into the consumer (see Fig. 1). Regarding claim 25, the fuel cell is operable on hydrogen (see col. 4, line 63). Regarding claims 24, 28, 74, and 75, the pumps are capable of being controlled in the claimed manner. As such, the claimed subject matter is anticipated.
